

WEEK TWO

1. Double-click on the **Intro to HTML folder** located on the **desktop**.
 2. Double-click on **your folder**.
 3. Open the **template.htm** file.
 4. Save the **File As page2.htm** in **your folder**.
 5. Open Notepad and open the page2.htm file.
 6. Modify the **page** with the following **HTML code** and **text content**.
 7. Save the changes.
-

```
<HTML>
<HEAD>
<TITLE>My Hobbies</TITLE>
</HEAD>
<BODY>
<H1>My Hobbies</H1>
<HR>

<BR>
I have been working very hard on my website.
<BR>
I hope you like what you see.
<BR>
Please come back and visit often.
<BR>
I will be changing it from time to time.
<P>
<HR>
This page was last updated on January 7, 2008
</BODY>
</HTML>
```

You can preview your Home Page by selecting switching to Internet Explorer, clicking on the **File** from the menu bar, and then selecting **Open File** after opening the browser (Internet Explorer). Click the **Look in:** drop-down menu and choose the Intro to HTML folder located on the Desktop. Double-click on your folder. Double-click on the new file. Click OK.

Remember the three steps:

- **SAVE**
 - **SWITCH [ALT + TAB]**
 - **REFRESH [F5]**
-
